

SPECIALISTS IN SOFTWARE DEVELOPMENT FOR STARTUPS

Specialists in Software Development for Startups - Konverge >

At Konverge we understand what it takes to get your brilliant idea, whether at a startup or within an existing organization, off the ground and into reality. With a proven track record and a sound development process, we offer both the technical and business knowledge that will help get your idea to market in a timely and cost-efficient manner.

Our mission at Konverge is to define, design and deliver optimal software applications that enable you to achieve your business vision.

In short, we turn business ideas into successful launches.

We believe that there are three main pillars of strength which firms seek when evaluating potential partners:

Accountability >

Full development here in Canada, not offshore, means decreased time to market and more responsive feedback to business and technical requirements.

Open Communication - Feel free to walk around our office and view progress on your project.

A complete Customer-Centric approach using our unique methodology for software development we call the Konverge Development Framework. By using KDF, each member of our team has clearly defined roles and responsibilities, allowing them to effectively leverage their skills.

Stability >

Fourteen years in business.

Profitable every year since inception.

Backed by an 80 year old firm also located in Toronto.

Knowledge - Tech & Business >

Experienced management team who have created and run their own startups.

Numerous awards for software development.

Microsoft Gold Excellence Partner
Gold Certified Partners represent the highest level of competence and expertise with Microsoft technologies, and have the closest working relationship with Microsoft.
